EDUCATION

B.Tech in Computer Science and Engineering – AI & ML

2022 – 2026

Vishnu Institute of Technology, Bhimavaram

PROFILE SUMMARY

Computer Science undergraduate specializing in AI and Machine Learning with hands-on experience building full-stack web applications and ML models. Completed Google AI/ML internship (AICTE – Government of India Recognized) working with TensorFlow, Scikit-learn, and Python. Built and deployed a full-stack food delivery platform with JWT authentication and payment flow. Strong foundation in Python, Java, DBMS, and Operating Systems. Targeting AI/ML or full-stack developer roles at product companies.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, HTML, CSS

Frontend: React.js, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication

Database: MongoDB, MySQL, Schema Design, Query Optimization

AI & ML: TensorFlow, Scikit-learn, spaCy, NLTK, NLP Pipelines, Data Preprocessing, Model Training & Evaluation

Tools: Git, GitHub, VS Code, Postman, Linux, Render

Core CS: OOP, DBMS, Operating Systems, Agile/SDLC

EXPERIENCE

AI/ML Virtual Intern | AICTE & Google – Government of India Recognized

April 2025 – June 2025

- Completed certified internship focused on core AI/ML concepts including supervised learning, model evaluation, and deployment workflows.
- Built and evaluated machine learning models using Python, TensorFlow, and Scikit-learn on real-world datasets.
- Performed end-to-end ML pipeline: data preprocessing, feature engineering, model training, hyperparameter tuning, and performance evaluation.

PROJECTS

Food Delivery AI Platform – Full-Stack Food Ordering System

Stack: Node.js, Express.js, React.js, Context API, MongoDB, JWT | GitHub: github.com/Gowthamsaidu/food-delivery-ai-platform

| Live: food-delivery-ai-platform-nigl.vercel.app

- Built a full-stack food delivery platform with JWT authentication, 3 concurrent user roles (customer, restaurant admin, platform admin), and restaurant/menu management.
- Developed React.js frontend using Context API for global cart state management, with restaurant listings, menu browsing, search/filter, and real-time cart updates.
- Implemented complete payment flow with order summary, delivery fee and tax calculation, payment processing, and order confirmation saved to MongoDB.

18 Events Management – Full-Stack Event Booking Platform

Stack: Node.js, Express.js, React.js, MongoDB, JWT, Razorpay, Stripe | GitHub: github.com/Gowthamsaidu

- Built an event booking system with user authentication, venue listings, dynamic package pages, and real-time booking management.
- Integrated Razorpay and Stripe payment gateways for secure online payments with full transaction lifecycle handling.
- Developed backend REST APIs using Node.js and Express.js with MongoDB for storing venue, user, and booking data.

AI Resume Analyzer – NLP-Powered Resume Analysis Platform

Stack: Python, Flask, spaCy, NLTK, scikit-learn, PyPDF2, HTML5, CSS3 | GitHub: github.com/Gowthamsaidu/resume-analyzer-nlp

- Built and deployed a full-stack AI-powered resume analyzer using Flask and NLP libraries (spaCy, NLTK) to extract skills, experience, and keywords from uploaded PDF resumes — processing each resume in under 3 seconds.
- Implemented resume scoring engine using scikit-learn to match candidate profiles against job descriptions, providing actionable skill gap analysis and improvement recommendations.
- Designed end-to-end NLP pipeline for PDF parsing, text preprocessing, named entity recognition, and structured data extraction with a responsive web interface for real-time results.

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 – AI Foundations Associate
- AICTE & Google – AI/ML Virtual Internship Certification (April – June 2025)
- NPTEL – Machine Learning (2024)

EXTRA-CURRICULAR ACTIVITIES

- Nominated as Mr. VIT Representative — Vishnu Institute of Technology.
- Active participant in AI/ML Department events and technical activities at VIT.
